***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance:
2. Applicants have claimed a method of imparting transparency or translucency to a liquid or gel type automatic dishwashing detergent product, said method comprising the steps of: a) providing a liquid or gel type automatic dishwashing detergent composition free from potassium tripolyphosphate, sodium tripolyphosphate, potassium tripolyphosphate, and mixtures thereof, b) adding one or more of potassium sources to said liquid or gel type automatic dishwashing detergent composition, said potassium sources being free of potassium tripolyphosphate', and c) maintaining a potassium:sodium weight ratio greater than at least about 0.5:1. The closest prior art of Cilley et al, US 4,933,101 and Wise, US 5,384,061 teaches automatic dishwashing compositions with controlled amounts of sodium and potassium ions to impart translucency to the compositions. The prior art, however, also teaches sodium tripolyphosphate as a highly preferred builder in these compositions. The prior art therefore, does not recognize the problem that applicants have solved, that is, formulating transparent compositions without the use of traditional phosphate builders. It would not have been obvious to one of ordinary skill in the art to exclude these builders absent the teachings of applicants. Accordingly, the present claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
